CURRENTLY PENDING CLAIMS

1. (Currently Amended)   A data mark and recall system, comprising:

a data stream;

a marking system, ~~wherein said marking system notes~~ including a marker, separate from said data stream, indicating a particular point in said data stream corresponding to ~~enhanced~~ additional data content;

a recall system, wherein said recall system allows a user to retrieve said ~~enhanced~~ additional data content separate from said data stream based on said marker; and

an ~~enhanced~~ additional content data display.

2. (Currently Amended)   A data mark and recall system in accordance with claim 1, further comprising a storage medium, wherein said marking system stores said marker to create ~~creates~~ a stored marker on said storage medium corresponding to said particular point for later recall.

3. (Original) A data mark and recall system in accordance with claim 2, further comprising a review system, which allows said user to review said stored marker.

4. (Original) A data mark and recall system in accordance with claim 3, wherein said review system is at least one of a television, a computer, a PDA and a cell phone.

5. (Original) A data mark and recall system in accordance with claim 1, wherein said data stream is a video stream.

2

6. (Currently Amended)   A data mark and recall system in accordance with claim 5, wherein said ~~enhanced~~ additional content comprises a static clip of a video scene corresponding to said particular point in said video stream.

7. (Original) A data mark and recall system in accordance with claim 2, wherein said storage medium is located remotely from said user.

8. (Original) A data mark and recall system in accordance with claim 2, wherein said storage medium is located locally to said user.

9. (Currently Amended)   A data mark and recall system in accordance with claim 2, wherein said ~~enhanced~~ additional content is stored on a remote ~~enhanced~~ additional content database.

10. (Currently Amended)   A data mark and recall system in accordance with claim 2, wherein said ~~enhanced~~ additional content is stored on a local ~~enhanced~~ additional content database.

11. (Original) A data mark and recall system in accordance with claim 2, wherein said stored marker is data related to a point in time.

12. (Original) A data mark and recall system in accordance with claim 2, wherein said stored marker is data related to a predetermined period of time.

13. (Currently Amended)   A data mark and recall system in accordance with claim 2, wherein said stored marker is data related to a temporally closest ~~enhanced~~ additional content point.

3

14. (Original) A data mark and recall system in accordance with claim 2, wherein said stored marker is data related to a point in time and a source.

15. (Original) A data mark and recall system in accordance with claim 14, wherein said stored marker is data further comprising a user identifier.

16. (Original) A data mark and recall system in accordance with claim 2, wherein said stored marker is data related to a geographic location of said user.

17. (Original) A data mark and recall system in accordance with claim 2, wherein said stored marker is data related to a point in time, a channel and a geographic location of said user.

18. (Currently Amended)   A data mark and recall system in accordance with claim 1, wherein said ~~enhanced~~ additional content is retrieved asynchronously from said marking.

19. (Currently Amended)   A data mark and recall system in accordance with claim 1, wherein said ~~enhanced~~ additional content is retrieved synchronously with said marking.
